About the Training:

This online 5-day training prepares group leaders to lead the 12-20 session [School Age Basic parenting program](#) (for parents of children ages 6-12 years). Content of this training includes: special time, academic, social and emotional coaching, praise and incentives, rules and responsibilities, limit setting, prosocial discipline, problem solving, ways to foster homework completion, after school monitoring, and supporting children's learning. Group therapy process issues, such as empowering parents, collaborating, goal setting, dealing with resistance, experiential practices, and supporting and advocating for parents will be discussed. This intervention program may be used by professionals (such as therapists and parent educators from psychology, social work, education, nursing and psychiatry) who are working with families of early school age children with behavior problems, high risk families, foster parents, and families referred by child welfare for neglect and abuse. The workshop will also illustrate how to use this program as a prevention program to promote children's social and emotional competence and academic success in schools. Our online trainings are intended to be highly interactive and collaborative. Attendees should plan for active participation!
